

Federal Register, Vol. 51, No. 148, August 1, 1986:

**CONSUMER PRODUCT SAFETY COMMISSION**

**Interagency Committee on Cigarette and Little Cigar Fire Safety; Ignition Propensity Testing of Patented, Non-Commercial Cigarettes**

**Agency:** Interagency Committee on Cigarette and Little Cigar Fire Safety, CPSC.

**ACTION:** Notice

---

**SUMMARY:** In the Federal Register of June 16, 1986 (51 FR 21790), the Technical Study Group on Cigarette and Little Cigar Fire Safety (TSG) invited inventors of cigarettes which are not produced commercially but which are claimed to have reduced propensity to ignite upholstered furniture and mattresses to submit samples of such cigarettes for ignition propensity testing. That notice described the testing program and requirements for consideration of cigarette inventions as candidates for testing in this program. That notice specified that only cigarette inventions for which a patent had been issued or for which a patent application had been filed by June 16, 1986, would be eligible for consideration as candidates for testing in this program. The TSG has revised its criteria for selection of candidate inventions to include any cigarette invention for which a patent has been issued or for which a patent application has been filed by September 30, 1986.
